

Penetration tester & Web  
developer

# Ahmed Almostafa Omer

## Objective

I Design Interactive Dynamic Websites using PHP, I do Penetration testing on Web applications and on-premises, I am passionate about cybersecurity.

## Projects

### WebTech Academy *online web development courses*

I built the website as the college required it from me as practicing the coursework, I used HTML,CSS,PHP and AJAX.

### Port Scanner *nmap port scanner*

I wrote a port scanning tool using python script including nmap , It detects the open port very fast.
